Assembly

Expand out the fold-able feet from the base.

1

Connect all the frame sections together using the coding on each section.

2

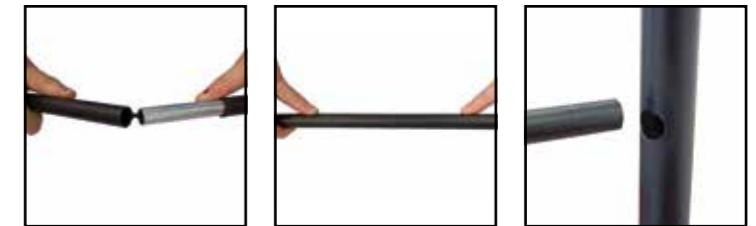

Loosen the screw in the foot base and insert the frame into the holes. Re-tighten the screw to secure the frame.

3

Assemble the supporting arm, then stretch the frame and insert the supporting arm into the centre.

4

Slide the graphic down onto the frame, running your hands along each edge to rid of any creases.

5

If using the spring to load a banner, hook each eyelet of the banner onto the corresponding spring section. (Do not rotate the hook as this will make the banner crease.)

6
